

Facebook Post-Event Marketing **Performance Analysis – Beyond** **the Metrics 2026**

Mahin Rahman

Objective:

Analyze pre-event Facebook posts to identify which content types and posting days generate the highest audience engagement, providing actionable recommendations for future event promotions.

Key Findings

Content Type Engagement (Average Engagement Score):

<i>Content Type</i>	<i>Avg Engagement</i>
<i>Event Update</i>	51.7
<i>Judge Introduction</i>	42.6
<i>Sponsor/Partner Highlight</i>	37
<i>Informational</i>	31

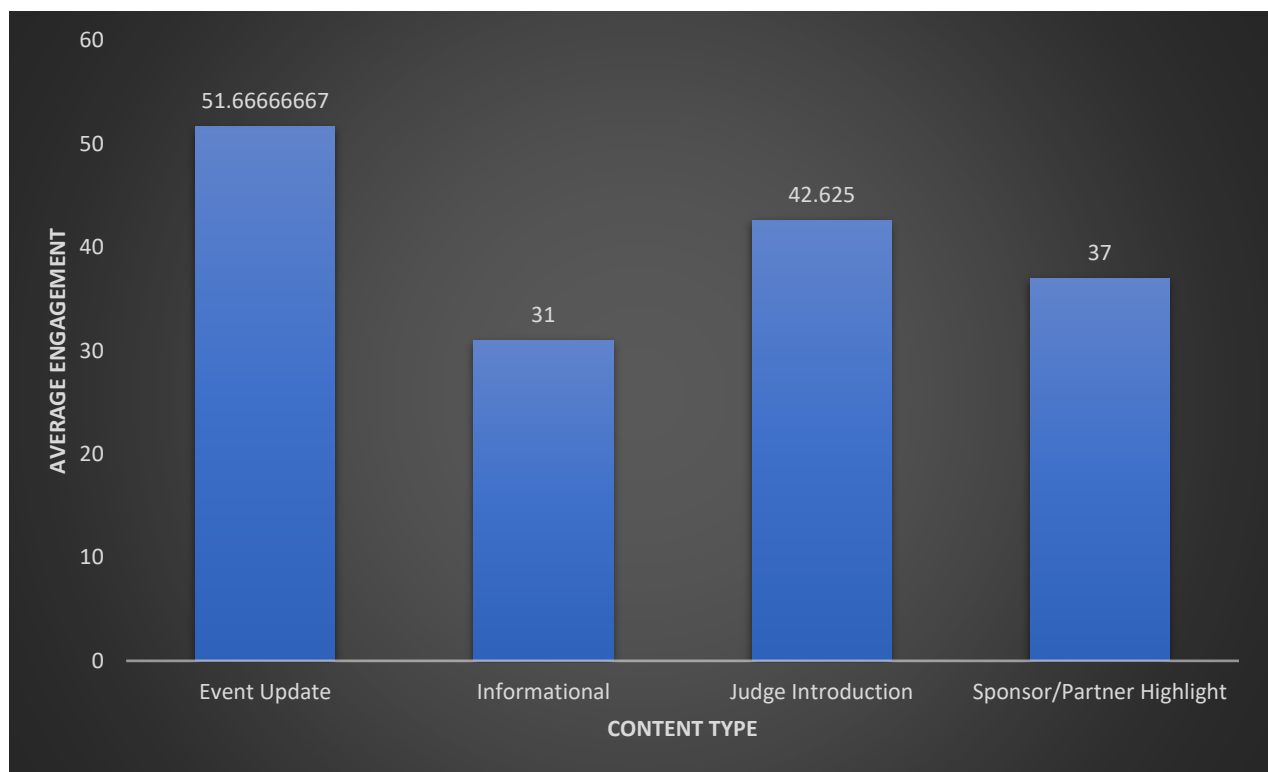

Figure 1: Content type vs. Average Engagement

Day Engagement (Average Engagement Score):

Day	Avg Engagement
Thursday	44.5
Sunday	43
Friday	30.5

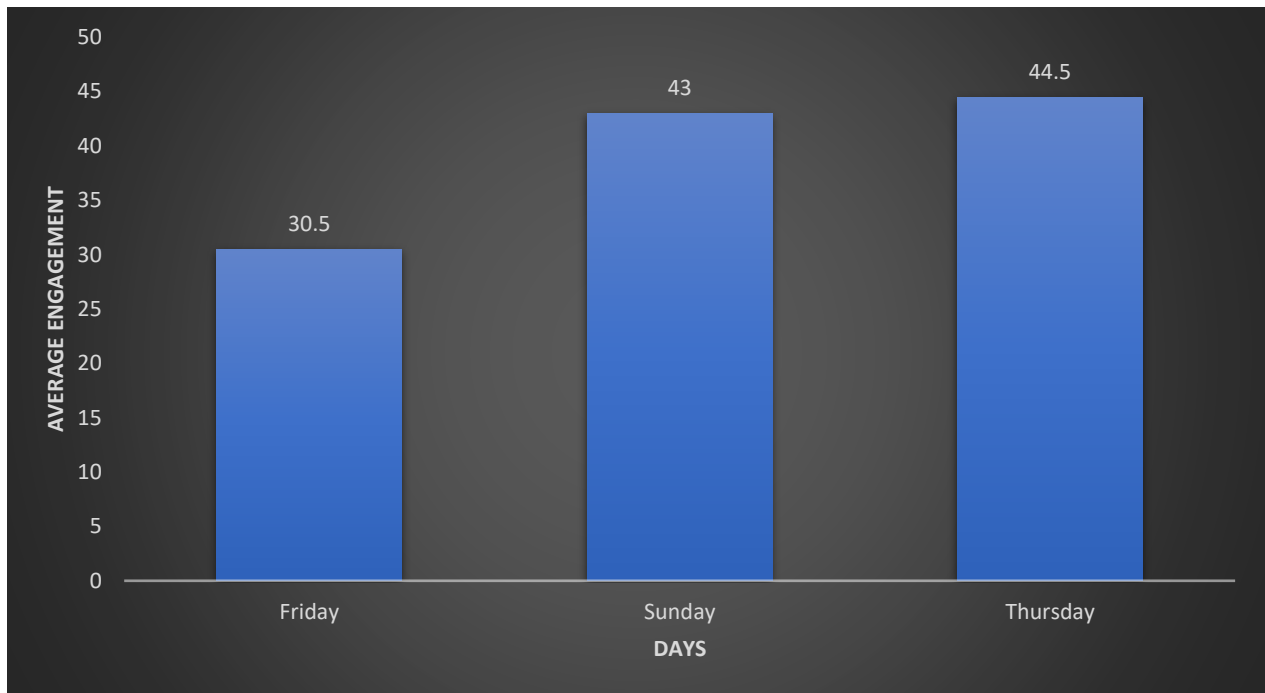

Figure 2: Days vs. Average Engagement

Insights

1. Event Update posts drive the most engagement:

Event Update posts outperformed Informational content by 67%, indicating that audiences respond strongly to direct updates about the event rather than general or promotional content.

2. Judge Introduction posts are also popular:

Highlighting speakers/judges engages the audience effectively, though slightly less than Event Update posts.

3. Optimal posting days:

Posts published on **Thursdays** recorded the highest engagement (44.5), closely followed by Sundays (43). Engagement drops on Fridays (30.5), suggesting audience activity peaks toward the end of the week.

Recommendations

- Schedule Event Update posts on Thursdays:**
Maximize audience interaction by posting key updates and announcements on the day with the highest engagement.
- Use Judge Introduction posts strategically:**
Feature judges mid-week to maintain engagement, but prioritize Event Update posts for major announcements.
- Optimize less engaging content:**
Informational and Sponsor/Partner Highlight posts can be supplemented with visuals or short videos to boost interaction.
- Consider testing registration link placement:**
Future analysis should examine whether including registration links in posts increases engagement, helping optimize conversion.
